Hi Jennifer,

As part of the standard OW advance notice review process for pre-publication ORD manuscripts, I received the attached Galloway et al. paper and associated documents yesterday regarding occurrence of PFOA and GenX in soil and surface water samples collected in areas surrounding the Chemours Washington Works plant in Parkersburg, WV.

I bring this paper to your attention particularly because:

On a related note, Jess Kramer recently requested an inter-office briefing between OW and ORD, with a specific focus on PFAS chemical research that has been or is currently being conducted. Jess has connected with Andy Gillespie, and a meeting is scheduled for Tuesday 3/19 at 11:00 AM.

Please let me know if you have any questions.

Thanks,  
Owen

**Subject:** Due: March 19 - Advanced Notice Manuscript for Galloway, Airdep of PFOA (significant comments)

Hi Owen,

ORD requested a review of a manuscript: Galloway, et al. Evidence of Air Deposition of PFOA. Significant comments from OST, Region 5, and Region 3 are included in the manuscript, the transmittal form, and in the attached email correspondence. OST has requested to review revised wording for a specific statement in the manuscript. That request is captured in the transmittal form.

Given the number of comments, I would suggest that ORD provide a revised version of the manuscript and it may be necessary to have a phone conversation as well. Please let me know how you would like to proceed.

Best,

Mary
